Dear Medway Council

I am writing to you because in my first idea, this is to change the road to protect hedgehogs. 150,000 hedgehogs die per year from how much roads are built.

If you build hedgehog highways you will save thousands of hearts. Hedgehogs have a really small population because of how much busy, bold roads are built. Certainly, don't you want to be

The
Hodgehog

on the right side of history?

thirdly, can you please change the aggressive speed limits. Please, please, please change the loud, high speed limits and if you do this then you will save these precious, beautiful, little creatures also they can only go across the busy roads 2mph.

For these reasons if you build hedgehog highways and reduce speed limits you will be responsible, nice people. I know you are smart, good people it's obvious you will make the right decision. do you want to be villains or not.

Yours sincerely
Noah
