

Temperature Activity (including negatives)

Sally Cloudburst is a weather presenter, she has to report the temperatures for different cities in the UK. Unfortunately a large gust of wind has just blown her notes away and she only has a few clues about today's lunchtime temperatures. Can you help her piece the facts together and then label the map with the correct information?

<p>⑦ Today, Aberdeen is 6°C colder than Newcastle is. -9°C</p>	<p>⑤ The temperature in Cardiff this lunchtime is exactly halfway between that of Manchester and Southampton. 2°C</p>
<p>④ This lunchtime, Southampton is 11°C warmer than Belfast. 6°C</p>	<p>⑨ The temperature in Norwich will be 8°C warmer than Edinburgh today. 4°C</p>
<p>⑪ Today, the temperature in Leeds will be 6°C below that in Plymouth. -1°C</p>	<p>① The temperature in Manchester this lunchtime is -2°C.</p>
<p>Birmingham is 3°C warmer than Manchester today. 1°C</p>	<p>⑧ This lunchtime, the temperature in Edinburgh will be exactly halfway between that of Birmingham and Aberdeen -4°C</p>
<p>⑥ The temperature in Newcastle is 5°C colder than Cardiff today. -3°C</p>	<p>⑫ This lunchtime, London will be 4°C warmer than Leeds. 3°C</p>
